

# Pool Ratios Guide

We want your visit to be a fun, safe and memorable experience so have developed safe adult:child ratios taking into account the unique size, shape, features and depths of our pools.

Children under 8 years must be accompanied in all public sessions as follows:-

- ***One adult (responsible person aged 16 years or over) may supervise two children aged between 4 and 7 years OR***
- ***One adult may supervise one child aged under 4 years***

The accompanying adult should maintain a constant watch over any children in their care in both the pool and changing areas, and should remain in close contact with weak/non-swimmers.

Children aged 8 and over may swim unaccompanied, however parents should only permit this if they are satisfied that their child is physically able to manage this. Parents should take into account their child's swimming ability, maturity, confidence and general common sense before allowing their child to swim unaccompanied. Our lifeguards on duty will advise any weak/non-swimmers on which parts of the pool they may use.
